AIConf.

18 - 19 May 2018

https://aiconf.org

An exploration of the future of education:
How AI and machine learning will change our lives.

"The fourth industrial revolution has the potential to disrupt radically areas such as education, employment and the fabric of society itself. This conference seeks to explore how we prepare our young people for the future impact of artificial intelligence, as well as the effect it will have on the teaching profession. Our inspirational speakers will discuss these issues from a practical, ethical and philosophical perspective. I hope you will be able to join us."

Simon Balderson
Assistant Head (Digital Strategy) of Wells Cathedral School

Cedars Hall
Wells Cathedral School
Somerset, BA5 2ST

Why Attend?

AIConf. will give you a unique insight into the future of both education and society as a whole. It is the first conference of its kind in the UK, aimed at school leaders, governors, teachers, consultants, parents and innovators.

A mix of keynote speakers, workshops and discussions will educate and inspire you over the course of two days in Cedars Hall, our RIBA award-winning venue.

Keynote speakers include:

Sir Anthony Seldon
(University of
Buckingham)

Professor Rose Luckin
(UCL Knowledge Lab)

Dale Lane
(IBM / Watson)

Professor Keri Facer
(University of Bristol)
